

skin care creme

Data sheet

Tube with 100 ml (6 M)
**with allantoin, panthenol
and sweet almond oil**

For severely stressed skin and skin-protection in
the shunt area of dialysis patients

Area of application

Renacare is a particularly well compatible skin care creme. It is absorbed quickly, has a regeneration effect, protects and maintains strained skin lastingly. It makes the skin smooth and healthy.

Renacare skin care creme is indicated for daily care of stressed, dry, rough, chapped, dry and itchy skin.

Instruction for use

At least 1x daily.

Lightly applied on the affected skin, Renacare skin care creme has the most effect without shining and grasing.

Information

Allantoin ameliorates the *wound healing process* by modulating the inflammatory response of the skin. Additionally it has a *moisturising and keratolytic effect*. The irritated skin becomes smooth again.

Panthenol is a pro-vitamin of Vitamin B5 and plays an important role in the skin metabolism. It is used as a *moisturiser* and improves *wound healing*. Furthermore panthenol has *pruritus reducing and inflammation inhibiting qualities*.

Sweet almond oil is prepared from the sweet fruits of the almond tree (*Prunus dulcis*). The oil is good for application to the skin as an *emollient* und shows positive effects by atopic dermatitis and acne.

The **pH-value of 7.1** stabilizes and provides a natural protective coat.

NEW:

- ✓ **without parabens**
- ✓ **without paraffins**
- ✓ **without polyethylene glycol (PEG)**
- ✓ **known „Nivea“-perfume**
- ✓ **fast infiltration**
- ✓ **stabilizes the natural protective coat**
